### HOW TO PROTECT THE DATA. THE CYBERSECURITY

*Starting from the assumption that Big Data are the "new millenium oil" that feeds AI systems and an economically relevant asset for those who manage them, we will examine which are the risks and which are the systems to protect their integrity and availability.*

*The topic at EU level has its normative reference in the Cybersecurity Act Regulation 2019/881 (The Cybersecurity Act became effective in June 2019 and strengthens the EU Agency for cybersecurity (ENISA). It establishes an EU-wide cybersecurity certification framework for ICT products, services, and processes with the purpose of protecting the systems of organizations from cyberattacks.*
